

Noosa Biosecurity Plan 2020-Fact Sheet 1

Invasive plants-Prevention

The *Biosecurity Act 2014* identifies a number of invasive plant species that are a threat to biodiversity, the economy and the Noosa community. Through early detection and concerted efforts by landowners, Council, Queensland Government, Natural Resource Management organisations and volunteers, five invasive species have been successfully controlled in Noosa Shire. If you notice these species please contact Council on 5329 6500 or mail@noosa.qld.gov.au.

Water mimosa

Neptunia sp.

Cha-om

Senegalia insuavis

Parthenium

Parthenium hysterophorus

Mexican bean tree

Cecropia spp.

Madras thorn

Pithecellobium dulce
