Construction Notification – Woongar Street, Boreen Point

Project summary

Noosa Shire was significantly affected by the 2022 rainfall and flooding event. Council continues its reconstruction efforts across the Shire to reconstruct essential public assets such as roads and stormwater infrastructure.

The stormwater infrastructure at Woongar Street, Boreen Point was impacted significantly and reconstruction is required.

The Project team has now completed the necessary engineering and design work and awarded the construction contract.

Damaged stormwater area

Overview of works

The works being completed will reinstate the stormwater infrastructure by rebuilding the inlet pits and under-road chamber. This will require the road to be demolished and reconstructed.

The construction program will include the use of heavy machinery, delivery of materials, demolition, and concreting works.

Community impacts

Works are scheduled to commence the week beginning 25 September and finish early December, weather permitting.

Construction will mostly occur Monday to Friday from 6.30am to 5.30pm. There will be typical construction noise during these times.

While the works are being completed, the damaged section of Woongar Street will be closed. There will be a detour in place via Hector Street, Toolara Street, and Vista Street. Please refer to the map on the second page. Please ensure all traffic signs and instructions are followed to ensure the safety of all road users and construction workers.

The school bus driver is aware of the road closure and has made plans for the P104 school bus route. The pickup and drop will occur at the nearby road closed sections of Hector Street and Vista Street.

Funding

The flood recovery effort for Noosa Council is jointly funded by the Commonwealth-State Disaster Recovery Funding Arrangements (DRFA). DRFA funding allows for the reinstatement of assets to the functional use existing prior to the disaster event.
