Sunrise Beach, Sobraon Street - slope stabilisation complete

Project summary

The intersection of Vernon and Sobraon Streets at Sunrise Beach sustained significant damage during the 2022 rainfall and flooding event.

The failure of the slope threatened the roadway and other essential public infrastructure.

The work to reconstruct this area is now complete, with the road also restored to normal operation.

We would like to thank residents and motorists for their patience and understanding while these works were completed.

Overview of works

Reconstruction included:

- permanent redirection of underground stormwater to David Low Way.
- using rock filling and rock-filled gabion baskets to stabilise a section of damaged slope approximately 13m wide.
- reinstating the damaged footpath and kerb and channel.

Assistance to deliver this resilience project was provided through the jointly funded Commonwealth-State Disaster Recovery Funding Arrangements (DRFA).

Location of damage at the intersection of Vernon and Sobraon streets

Completed work at intersection
