

17 October 2023

Construction notification – Old Tewantin Road, Lake MacDonald

Project summary

Noosa Shire was significantly affected by the 2022 rainfall and flooding event. Council is continuing its efforts across the Shire to reconstruct essential public assets such as roads and stormwater infrastructure.

The water crossings near the property boundaries of numbers 62 and 88 were impacted significantly and reconstruction is required. The project team has now completed the necessary engineering and design work and has awarded the construction contract.

Overview of works

New culverts will be installed to help withstand possible future disaster events. This will require the road to be demolished and reconstructed after culvert placement. Suitable environmental controls will be put in place.

The construction program will include the use of heavy machinery, delivery of materials, demolition, and concreting works.

Damaged culvert

Community impacts

Works are scheduled to commence Thursday 19 October 2023 and finish early December 2023, weather permitting.

Construction will mostly occur Monday to Friday from 6.30am to 5.30pm. There will be typical construction noise during these times.

Works will result in some traffic disruptions with side-tracks constructed near the sites to allow for continued traffic access. Traffic control will also be used at times to stop motorists for short periods. Please ensure all traffic signs and instructions are followed to ensure the safety of all road users and construction workers.

Funding

The flood recovery effort for Noosa Council is jointly funded by the Commonwealth-State Disaster Recovery Funding Arrangements.

Council appreciates the ongoing patience and support from the community as the reconstruction program continues.
