
UPDATE: Peregian Beach, Skate Park Upgrade

Project update

Work on the Peregian Skate Park upgrade is progressing well. However, due to some unforeseen factors, the construction timeline has been extended, with the project now expected to be completed in October 2024.

Skateboarding and scooter riding continue to be highly popular activities for people of all ages in the Noosa Shire. To meet this growing demand, Council is pleased to be upgrading this much-loved recreational space.

Design

Council has engaged Concrete Skate Parks, a renowned and experienced skate park designer, to ensure the new design meets the needs of all users while fitting seamlessly with the unique characteristics of the site.

The new park will include three distinct zones:

- Zone 1 – beginner bowl
- Zone 2 – competition flow bowl
- Zone 3 – rest area

Key considerations incorporated into the design include:

- replicating the existing footprint
- retaining the current shade sail
- minimising impact on the existing Norfolk Island Pines and coastal vegetation
- mitigating impacts within the coastal zone
- enhancing drainage for the skate bowl.

Timing and community impact

Work began after the school holidays in July 2024 and is anticipated for **completion in October 2024**.

During this period, the skate park remains closed for safety reasons with safety barriers installed. Access to the beach, playground, and amenities will remain open as usual.

These works are proudly funded by the Queensland Government's South East Queensland Community Stimulus Package in association with Noosa Council.

We appreciate your patience and look forward to delivering an improved facility that will serve the community for many years to come.

New skate park layout and features.
