

## Noosa Main Beach - Sand Break Seating

### Project Summary

Noosa Council is trialing a prototype sand break seat designed to help reduce the amount of sand accumulating on the boardwalk while also providing a comfortable spot to sit and take in the beautiful views of Noosa Main Beach.

This seat style sand break will replace the existing fencing covered with shade mesh, as pictured below.

Additional seats will be installed from 11 February to further enhance the beachside experience for locals and visitors alike.

We welcome community feedback on this initiative as we continue to explore ways to improve our shared spaces.
