

This form can be used when a property owner is seeking an exemption from the fortnightly garden waste recycling bin service. An exemption may be awarded if one of the following criteria applies.

Please refer to Further Information over the page.

Indicate below the exemption criteria you are relying upon for an exemption.

- I employ a gardener contractor who regularly removes all of my garden waste other than burial into the landfill. My gardener contractor has certified below that they do not want to make use of an onsite fortnightly garden waste recycling bin service.
- My property is 400 Square metres or less in area and I do not have any garden waste.

Note: Owners self hauling garden waste to landfill will not be exempt.

1. Applicant (property owner) details			
Surname		Given names	
Address of property for exemption	No	Street	
Suburb		State	Postcode
Home Phone Number			Mobile
Email address			

2. Details of Garden Contractor used to remove all green waste from the above property and dispose of it to a facility that will ensure that it is recycled.	
Name of garden contractor's business:	
Phone number of garden contractor:	ABN:
Frequency of contractor's service:	Vehicle Regn No.

Further Information.

Owners can apply for an exemption from the service where they meet the criteria detailed on this form. Your gardener contractor must certify that they do not want to use the garden waste bin service on your property. Gardeners must nominate their ABN and the registration number of the vehicle/s used to transport garden waste to the resource recovery facility. This information will be checked with landfill disposal records.

Owners claiming to self haul garden waste to landfill cannot be exempted from receiving at least 1 fortnightly garden waste recycling service. Exemptions will be cancelled if garden waste is placed into the general waste bin.

From September 2017 all existing single dwellings and duplexes in urban areas were provided with a 3 bin waste collection service which included a 240 litre garden waste recycling bin collected fortnightly.

This service reduces organic waste to landfill resulting in improved environmental performance of the landfill and saving of space consumed by garden waste that is a recyclable product.

Garden waste collected in the garden waste bins will be mulched and processed and can be collected by residents for reuse on your garden.
