
David Low Way Retaining Wall Replacement, Sunrise Beach

Project Summary

Council contractors will soon commence work on replacing the existing retaining wall along David Low Way in Sunrise Beach.

Situated adjacent to 56 David Low Way and about 200 metres south of the Orealla Crescent Bridge, the aging timber retaining wall has reached the end of its service life and will be upgraded to a durable concrete structure. Designed for low maintenance and long life, the new wall will support the construction of a 3-metre shared pathway, enhancing safety and accessibility for cyclists and pedestrians.

Scope of Works

The scope of works includes:

- Excavation
- Installation of piles
- Concrete works
- Landscaping and tree removal
- Replacement of the southern retaining wall
- Associated road and footpath reconstruction

Timing

Construction is scheduled to **commence in early March 2025** and take approximately three (3) months to complete, subject to weather and construction conditions.

Work Hours

Construction will take place from Monday to Saturday, between 7am and 6pm.

Residents will be notified in advance of any night works or direct property impacts.

Traffic Impacts

Temporary traffic delays may occur due to site constraints, but both traffic lanes along David Low Way and pedestrian access will be maintained throughout the works.

Emergency services will be notified in advance and kept informed of any traffic changes.

Noise Impacts

While every effort will be made to minimise disruptions, construction noise will be present during the project. Noise and vibration monitoring will be conducted to help mitigate impacts.

Tingira Park Closure

Due to limited space, Tingira Park will serve as a fenced site compound for the works duration.

Funding

This project is proudly funded by the Queensland Government's Local Roads and Community Infrastructure (LRCI) Program, in partnership with Noosa Council.
